

Introduction to NFT

Industry Overview

Introduction to NFT

With the help of NFT virtual items can become assets. NFT stands for non-fungible token, which is a kind of non-fungible asset, unique and not interchangeable. Most assets in both the real and virtual world are non-fungible. NFT can map virtual items and be used to trade virtual items. Any data can be mapped on the chain, so that NFT becomes an "entity" of data, thus realizing the value flow of data. In this way, equipment, decoration, and land property rights are now tradable entities.

NFT and Games

NFT games have been growing rapidly in 2021. The P2E model, powered by blockchain technology, is unleashing digital economic opportunities. Playing games is no longer just a time-killing activity but a job. Gamers spend time and energy playing games day after day, earning income for their families.

The Play-to-Earn business model has been around for a long time. In games like World of Warcraft, some players make money by selling equipment. In NFT games, this model has been upgraded to allow players to earn real money by playing games with cryptocurrency-based assets. By actively participating in these virtual economies, players can earn rewards, such as assets and tokens in the game, which can then be traded or sold on the open market.

The new generation of NFT games focuses more on combat, management, and fun networking while ensuring gaming performance. Not only that, but it also offers the possibility to create value and build wealth for different types of players.

MarscoinOriginal Goal

Based on the plan to go to Mars initiated by 24 Earth Heroes, along with the huge potential brought by the blockchain technology, we are proud to announce the issue of MarsCoin for Mars lovers around the world to support Elon Musk's plan to migrate to Mars and to form a self-governed decentralized consensus community MNFT.

Introduction to the Project

MNFT is an NFTeco-application released by Marscoin. It guarantees that gamers have full control over their items in the game and creates a whole new gaming experience.
